### Abstract

*The purpose of this research is to determine the interest of students at SMPN 17 Malang towards volleyball. Thus, the approach used is quantitative descriptive research. The sample in this research was all class VIII students at SMPN 17 Malang, totaling 35 students. Data analysis techniques used to analyze interest in volleyball among students at SMPN 17 Malang. From the results of data analysis, only 6 students (17.14%) had a 'high' interest in volleyball. Meanwhile, 21 students (60%) had 'medium' interest in volleyball, and 8 students (22.85%) had 'low' interest in volleyball.*

## 1. INTRODUCTION

PJOK is education where students can become fit and healthy. Students must reach a good level or be physically and mentally healthy (Surahni, 2017). PJOK can use basic education to develop the character of a generation. The learning objectives of PJOK are to lay and develop (1) the foundation of character through the internalization of values, (2) the foundation of personality (love of peace, social, tolerance in the diversity of ethnic and religious cultures, (3) thinkingcritical, (4) sportsmanship, honesty, discipline, responsibility, cooperation, self-confidence and democracy, (5) movement skills, techniques, strategies for various games and sports, gymnastics, rhythmic activities, aquatics and out-of-class education, (6 ) self-management skills, maintaining physical fitness and a healthy lifestyle, (7) skills to maintain the safety of oneself and others, (8) the concept of physical activity to achieve health, fitness and a healthy lifestyle, and (9) filling free time that is recreational (Ministry of National Education in Surahni, 2017).

In the PJOK lesson there is volleyball material which is played by 2 teams, where each team consists of 6 players, and each team tries to drop the ball into the opponent's area. This game quickly caught on because it requires few basic skills, is easy to master in a short period of practice and can be played by players of all fitness levels.(Al Mujahidin & Wibowo, 2016).

Interest is very necessary in playing volleyball, because interest is what makes someone want to play volleyball, interest also means a motivational state or a set of motivations that guide behavior towards a certain direction or target (Faridah, 2019: 51).Based on the description of the background of the problem above, the problem that will be studied is what is students' interest in volleyball?

## 2. RESEARCH METHOD

This research was conducted to determine the interest of students at SMPN 17 Malang towards volleyball. Thus, the approach used is descriptive researchquantitative. The sample

in this study was all 35 class VIII students at SMPN 17 Malang student. Analysis techniques data used to analyze interest in volleyball among students at SMPN 17 Malang.

### 3. RESEARCH RESULTS AND DISCUSSION

#### 3.1. Research result

The interest of students at SMPN 17 Malang in volleyball in this study was evaluated or measured using an instrument in the form of a questionnaire. Based on the total score of the volleyball interest questionnaire for all students, the percentage of their volleyball interest level can be analyzed, as follows:

**Table 1 Percentage Interest in Volleyball**

Questionnaire Score	Interest Categories	Frequency (Number of Students)	Percentage
59 – 80	Tall	6	17.14%
37 – 58	Currently	21	60%
16 – 36	Low	8	22.85%
Total	-	35	100%

(Source: Processed data, 2023)

#### 3.2. Discussion

Table 1 above shows the results of the percentage analysis of the level of interest of SMPN 17 Malang students towards volleyball. The percentage analysis is based on the total volleyball interest questionnaire score obtained by each student. Based on the data listed in Table 1 above, out of a total of 35 students at SMPN 17 Malang who answered the questionnaire it is known that only 6 students (17.14%) had a 'high' interest in volleyball. Meanwhile, 21 students (60%) had 'medium' interest in volleyball, and 8 students (22.85%) had 'low' interest in volleyball.

### 4. CONCLUSION

From the results of the descriptive percentage analysis, it is known that only 6 students (17.14%) have a 'high' interest in volleyball. Meanwhile, 21 students (60%) had 'medium' interest in volleyball, and 8 students (22.85%) had 'low' interest in volleyball.
